

— ABOUT US

SuperGreen Solar is the leading Bahamian solar & energy efficiency company focused on saving you thousands on your electricity costs. Adding a solar system to your home reduces the cost of living, improves the environment, & increases your quality of life. Ask us about including battery storage to your solar system to gain independence from your utility provider & energy resiliency during power outages from equipment failure & hurricanes. Take advantage of the limited SSRG program capacity available for homeowners in The Bahamas.

— THE COMPANY

Why Choose Us?

From day one until your project is complete, SGS is there along the way leading & guiding you. Our experience combined with technology we're able to provide each homeowner with their best options. Ensuring that each step is processed in accordance with country regulations.

WE SPECIALIZE IN RENEWABLE ENERGY SOLUTIONS, INCLUDING:

- Residential Solar & Battery Systems
- Electric Vehicle Chargers
- Solar Water & Pool Heating
- Portable Solar Generators
- Solar Lighting

STEP ONE

Provide us with a copy of your electricity bill & Location Pin.

STEP TWO

Choose a solar system that fit your energy needs & await the utility approval

STEP THREE

Watch us install your new system & enjoy the savings.

ALL OF OUR SYSTEMS ARE WARRANTIED & INSTALLED WITH AN AESTHETICALLY PLEASING LAYOUT BY OUR EXPERIENCED TECHNICIANS

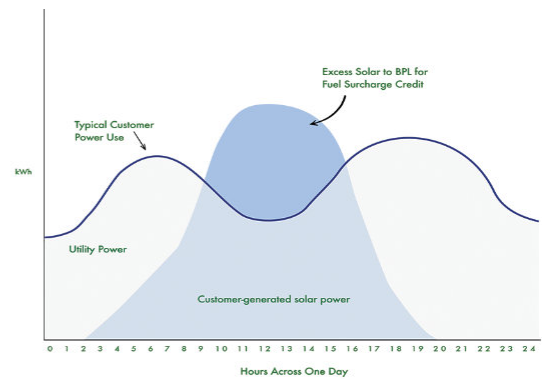

Would you rather pay utility bills for life or make a one-time investment to gain your energy independence?

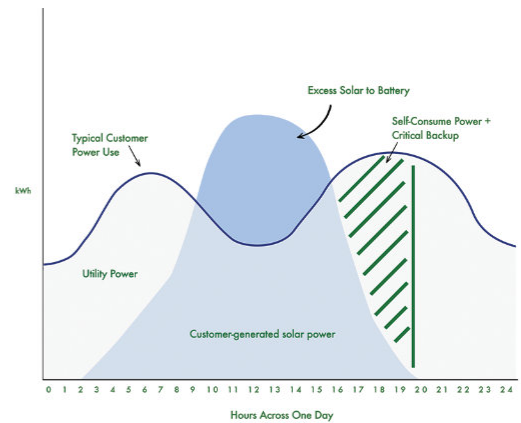

Solar Grid-tie

- ☑ Lowers utility demand up to 75%
- ☑ Solar system is off when power is off
- ☑ Lower initial investment compared to other systems
- ☑ System can be expanded

Solar Grid-tie with Critical Load Panel Backup

- ☑ Lowers utility demand up to 100%
- ☑ Reliable & consistent power for smaller appliances
- ☑ When power is off, devices connected to the critical load panel remain ON
- ☑ System will stop electricity meter once solar & battery are available
- ☑ May require re-wiring of electrical panels

Whole House Solar & Battery

- ☑ System runs & backs up the entire house 24/7
- ☑ Power during and after power outages
- ☑ Utility connection remains, only as a last resort
- ☑ Integration with backup generator available to provide additional protection against surges and black outs
